EDUCATION & AWARDS

Seneca Polytechnic

Honours Bachelor of Technology, Software Development | GPA 3.7

Ontario College Diploma, Computer Programming | GPA 3.7

Toronto, ON

Expected Summer 2028

May 2024 – Dec 2025

Awards: International Student Achievement Award (Summer 2026), Student Ambassador Award (Winter 2026)

Certifications: PMI Project Management Ready, Certified Blockchain Associate, First Aid & CPR/AED Level C

TECHNICAL SKILLS

Languages & Tools : Python, JavaScript, SQL, C, C++, Bash / Shell hardware integration, Git, Markdown, Makefiles

Backend, Frameworks & Tools: Django, Django REST Framework, FastAPI, Express, Node.js, Next.js, React, REST APIs, OpenCV

Data & Databases: PostgreSQL, Oracle SQL, MySQL, MongoDB, schema design, query optimization

Cloud & DevOps: AWS, GCP, Docker, Nginx, Linux, GitHub Actions, CI/CD, Vercel, shell automation, Network configuration

PROJECTS

Patient Management System

Django REST Framework, PostgreSQL, Docker

- Built and deployed a clinical records system at an alternative medicine clinic, managing 1,000+ patient records: registration with generated ID cards, program enrollment, payments, and consultation logs.
- Designed the relational schema across patients, practitioners, programs, enrollments, sessions, payments, and an append-only audit log, with role-based access separating front-desk and clinical views.

Android Build & Release Automation

Python, Bash, Linux, GitHub Actions – CI/CD

- Built a GitHub Actions pipeline for a custom Android kernel that compiles on every push and publishes builds to a Telegram channel for beta testers, removing manual work from each release.
- Wrote provisioning tooling that sets up a clean AOSP build environment, applies device patches, and runs unattended ROM builds on a remote cloud server, reducing a multi-hour manual setup to a single command.

Book Discovery Platform

Next.js, JavaScript, Express, MongoDB, JWT

- Built a full-stack app with a React front end and a separate Express API: JWT auth over bcrypt-hashed credentials, route guards for protected pages, and per-user saved collections in MongoDB.
- Integrated a public catalog API with client-side caching and paginated search; deployed both services to Vercel.

OPEN SOURCE

CipherOS - Co-Founder & Developer

Dec 2020 – Dec 2022

- Co-founded V1 of a custom Android OS distribution and maintained official device builds for a public user community, handling releases, triage, and contributor review.
- Debugged and booted the first working build by adapting the base architecture to unsupported hardware, resolving boot-level failures that blocked the initial release.

Alien Kernel - Lead Developer, Project Sakura - Device Maintainer

Jul 2020 – Oct 2021

- Led development of a custom Linux kernel for Android, working in C on systems-level performance and stability patches; maintained device support for a second AOSP project.

EXPERIENCE

Co-Founder & Lead Developer, Dravix Studios

Aug 2026 – Present

- Co-founded a web solutions, AI, and IT consulting company (dravixstudios.com) serving clients in Toronto and India; shipped 9 production sites and 3 recurring paying clients.
- Build and deploy client systems in Next.js on Vercel, including alomcare.com, orisdentistry.com and wamiqadesigns.com, an automated ordering flow with payment gateway checkout, and a patient management system, owning requirements through hosting, automation and maintenance.

Vice-Chair, Board of Directors, Seneca Student Federation

May 2026 – Present

- Elected by students to help govern a student organization with a \$13.7M annual operating budget, holding fiduciary responsibility for budget approval and organizational oversight.
- Ran a technical gap analysis of the organization's Drupal 8 website, identified end-of-life security exposure, and raised structured accountability questions to leadership.

Vice President, Google Developer Group on Campus, Seneca

Jan 2026 – May 2026

- Rebuilt a campus developer chapter inactive for several semesters, coordinating AI workshops and running the tech booth at International Days across two campuses.

Senior Student Office Assistant, Seneca Polytechnic

Oct 2024 – Present

- Lead student services operations, host orientation events for incoming students, coordinating presenters across departments.
- Serve as administrator and Lead Mentor for the peer mentoring program, onboarding and training mentors and overseeing mentor-mentee matching on the Chronus platform for 300+ students.
